## **OUICK TO SOLVE PROBLEMS**

According to Woodsmen, the Wolf Is Capable of Displaying Sagacity That is Wonderful.

A correspondent having written a letter to the Star expressing doubt as to the truth of the story that wolves, having chased a man up a tree, went away and brought back a beaver to cut down the tree for them so they could get the man, we have been much impressed by the number of witnesses, especially old-timers in New Ontario, who are sending us letters tending to add authenticity to the

Wild animals, these witnesses declare, are strong in instinct, and work out problems instantly which one would suppose could only be done by arithmetic. In one letter the writer, who lives in the Cochrane district, gives his theory as to the manner in which the wolves got the beaver to the tree. According to the story, a dozen wolves went off on this errand. This number was in order that they might kill a deer, and use its hide as a toboggan on which to haul the beaver to the spot and take him back again after be had felled the tree for them. This theory must be accepted as ingenious and interesting.-Kansas City

#### Animals That Fly.

Among the many odd animals perhaps the oddest are the flying animals. There is the flying-fox or fruit-eating bat. In the moonlight stillness of the forest flying opossums may be seen gliding through the air. The flying mouse, able to sleep in a good-sized match-box, is decidedly Australian, It would be very interesting for all the children of other countries to see these strange creatures. Australia is peculiar also by reason of the animals which are conspicuous by their absence. There are in Australia no apes, no oxen, no antelopes, no deer, no elephants, no pigs, no cats, wolves or bears-none of the animals children in other parts of the world are fond of talking about.

#### Simple Test of Cloth.

Te determine whether any fabric contains wool, mix a tablespoonful of lye with a quart of water in a granite pan. Boil a sample of the material to be tested in the lye solution. The wool in the material will be completely dissolved while the cotton will be left. If threads are left the material is wool one way. If a woven piece is left the material is either all cotton or threads of the warp and filling are cotton and wool mixture. Silk and cotton mixtures may be tested in this manner, but silk dissolves more slowly than wool. If the combination is artificial silk and cotton the fibers will swell, but the material will remain intact.

Red Men Not Really Red. The American Indian is not a red man. His actual color is yellow and he is akin to the Japanese, Chinese and Koreans,

So says Dr. Clark Wissler of the American Museum of Natural History in the March number of the Mentor Magazine.

Scientists now believe that the Indian migrated to America from Asia via the Bering straits and Alaska, Dr. Wissler says.

Thank Indians for National Bird. The Pilgrim Fathers did not "invent" turkey. Indians in the southern states domesticated the national bird and made him a regular item on their bill of fare long before the coming of the white man.

George Bird Grinnell, the man that knows the most about the Indian, says this in "First Families of America" in the Mentor Magazine.
